

HIGH GRADE ROOFING TOOLS

Did you ever have the misfortune to drop your all steel slate hammer and find it in two or more pieces?

Here is a **SLATE HAMMER** that will stand dropping, forged from best wrought iron, steel laid on blade, claw, head and point, with wood or leather handle.

SLATER'S TEE STAKE.

Forged from crucible cast steel.

One inch graduations.

Don't try to repair a shingle roof by driving one shingle over the other.

To cut the nails and remove defective shingle buy a **SHINGLE RIPPER**.

SLATERS' RIPPER.

Blade, 30 in. long, extra thin. Guaranteed to stand up on wire nails.

COLD CHISELS.

Have you got tired of buying ready made chisels, and paid an exorbitant price to your local smith to make you a few good ones? If this is the case, try **ISELE'S** and you will use no others. Made with flat, cape, round and diamond points, $\frac{3}{8}$ to 1 in.

AND
MASONS'
TOOLS.

1871.

Send for Catalogue.

No, this is not a cheese knife, it is a JOINT or DIGGING OUT CHISEL.

Used for cutting or digging out joints of brick work for flashing, etc. Length, 12 inches.

ROOFERS' SCRATCHING BAR.

Used for removing gravel from composition roofs. Crucible steel blade, iron handle. Length about 5 feet.

There is one thing a tool is sure to get, that's **abuse**. Isele's tools are made to resist this abuse and to do so without being clumsy. Made with sense and judgment from materials that have been time tested and proven to be the best for the purpose; made with a view to long life; made to last; to remain efficient to the last, and to head the list of **ROOFING TOOLS**. You buy **ISELE'S TOOLS** on the broadest kind of a guarantee that they are as near perfect as tools can be made.

In ordering tools, specify our make. The difference in price is small in comparison with the greater amount of wear there is in them.
